

Learning through discovery...

Over a million years ago, deep beneath the ground, our classroom began to form. Water gradually dissolved the rock to create an amazing underground world. Today, you can still see that water dripping into our cave. Listen to the timeless sound, and imagine yourself back in an ancient world.

...where wonders loom around every corner...

Cave of the Mounds is proud to serve a wide variety of groups ranging in age from preschool through adulthood, for both recreational and educational purposes. We provide a memorable experience designed to meet the needs of each group while supporting the goals and objectives of teachers and group leaders.

...for an experience they'll never forget!

Educational Programs are developed and presented with the cave experience in mind, encouraging your group to make connections in relation to their actual experience and that's powerful learning!

Reserve your unforgettable trip back in time today!

Discover Buried Treasure
Discover Fun!

Educational Programs

Explore science both above and below ground!

Students make connections to other areas of learning through educational programs. Each program gives your group the unique opportunity to discover topics in a natural setting with an active hands-on approach for powerful learning!

SpeleoQUEST takes your group on a journey through sinkholes, caves and the interesting nature of Wisconsin's driftless area and surrounding karst landscape.

Diggings to Discovery explores the cultural history of the Blue Mounds area and the Cave of the Mounds site from early settlers through the lead mining boom to the discovery of our cave.

Mound Bound Orienteering introduces students to the basics of navigation and using a compass to find their way, while they learn both individually and as an active member of a team.

RocksROCK provides each student with his/her very own collection of rocks, minerals and gems to investigate as they explore the most basic materials that form the Earth.

PaleoTALES examines the stories that ancient life can tell us about how Earth existed in the distant past through the identification of their very own authentic fossil collection.

GeoJourney presents students a deeper look into the formation of rocks or fossils and their orderly development through geologic time through the identification of their very own collection.
